

IKS2012

I International Keys Fair

Welcome to IKS 2012,
I International Keys Fair, exhibition devoted entirely to everything what is connected to keys, cutting keys and programming keys.

Inter Key Service 2012 is the first in a series of periodic fairs, where every year you can see and buy new products and services in our industry.

We know that your companies are not just keys, so exhibitors will feature also products and services that are not only

directly associated with key cutting or key programming.

We know that fairs already operating in Europe (eg, Securex in Poznan and Security in Essen) are not providing a full view on the industry to your companies, as well as its range does not allow you to focus on the what is the most important. IKS 2012 is a place specifically dedicated to you and your needs.

EAST AND WEST

IKS 2012 - thanks to its location is an excellent platform that allows you to see in one place a full range of companies from both the East and West Europe. IKS 2012 is the perfect link and location for a full exchange of products and services.

DIRECT CONTACT

IKS 2012 - is the only event of its kind, exhibition that concentrates in one place exhibitors and visitors from one industry, a highly specialized and focused on their targets. The specificity of our fair allows you to find exhibitors whose products or services are most important for you.

LOWER COST

IKS 2012 - selection of the venue for the fair was influenced by the fact that the location provided a possibility of getting their with a fairly cheap way. We had also, in contrast to the standard trade fairs, resigned from entry fees and registration fees.

Who, if not us?

This idea guided us when we thought in our heads for the first time about the idea of organizing a trade fair in Poland dedicated only for locksmith industry.

MBE Engineering together with the European Lockmaster Group organized a meeting in 2011 in Vilnius, interest that shown and a number of visitors exceeded our wildest expectations. So this year we decided to raise the profile of the meeting to form the international trade fair dedicated to all companies focused on key cutting and key programming.

When we were organizing this exhibition we have also focused our attention on organizations strongly supporting the activities of the industry, we had invited locksmith associations from around the world (PSLSK, ELF, ALOA, ALA and others)

IKS 2012 is also an excellent opportunity to enhance your professional skills at one of the many workshops or additional practical trainings that will last during the entire event.

IKS 2012 I INTERNATIONAL LOCKSMITH FAIR

When we were choosing a location for the event, we were looking for a place that will be most beneficial to all interested visitors. We had chosen the hotel and conference center MCC Mazurkas in Ożarów Mazowiecki.

This modern hotel and conference center (over 3,500 m2 of exhibition space, 35 meeting rooms, 158 luxury rooms) offers excellent accommodation conditions and gives a comfortable environment for practical demonstrations, trainings and workshops.

The close proximity of the A2 motorway, the S8 expressway, airports (Chopin and Warsaw-Modlin), access to fair IKS 2012 is very easy. In the case of high interest shuttle bus connection will be established between the hotel and the airports.

Service 2012
Warszawa
1-2.12.2012
